

Read-Along Coach

A reading coach that **listens**
patiently.

Helps only when a child is truly stuck. Never marks them wrong when it couldn't hear clearly.

● Built on AssemblyAI Universal-Streaming

THE PROBLEM

One teacher. Thirty readers.

Reading is learned aloud

Someone has to wait while a child sounds out a word — and help at the right moment.

Attention is scarce

One-to-one listening is the thing a busy classroom has least of.

Fluency is hand-timed

Words correct per minute, measured with a stopwatch, one child at a time.

LEVEL 1

The Cat and the Sun

● Ready when you are

The cat sat in the sun. The sun was warm. The cat was happy. A big dog ran by. The cat did not move. The cat was too warm to care.

sat Correct **sun** Read next **The** Supplied by coach **ran** Different word **big** Skipped *move* Couldn't hear — never counted

No session scored yet

Press **Start reading** or **Play demo** — the report lands here when the reader finishes.

Progress starts after session one

Finish a read and the words-correct-per-minute trend, plus every past session, appears here.

The Cat and the Sun

●  Playing... Helping with one word: "The"

The cat sat in the sun. The sun was warm. The cat was happy. A big dog ran by. The cat did not move. The cat was too warm to care.

The next word is "The" — you've got this.

The Cat and the Sun

● That's the whole passage — finishing up in 1...

The cat sat in the sun. The sun was warm. The cat was happy. A ~~big~~ dog ran by. The cat did not *move*. The cat was too warm to care.

● AssemblyAI was unsure about “move” — grey means never counted as wrong.

Spoken help is using pre-recorded clips (your browser has no usable voices). Demo narration always plays, in full phrases, and is silenced with Pause.

How the coach behaves

Patience first. A pause is thinking time, not a mistake. Help only arrives after a real stall.

Honest scoring. If the microphone wasn't clear, the word is marked unclear — never wrong.

Private by default. Progress is kept on this device only.

THE FAIRNESS RULE

Unclear is never wrong.

The cat did not

move.

.....

AssemblyAI heard “**moo**” with low confidence.

Confidence below threshold → “couldn't hear”

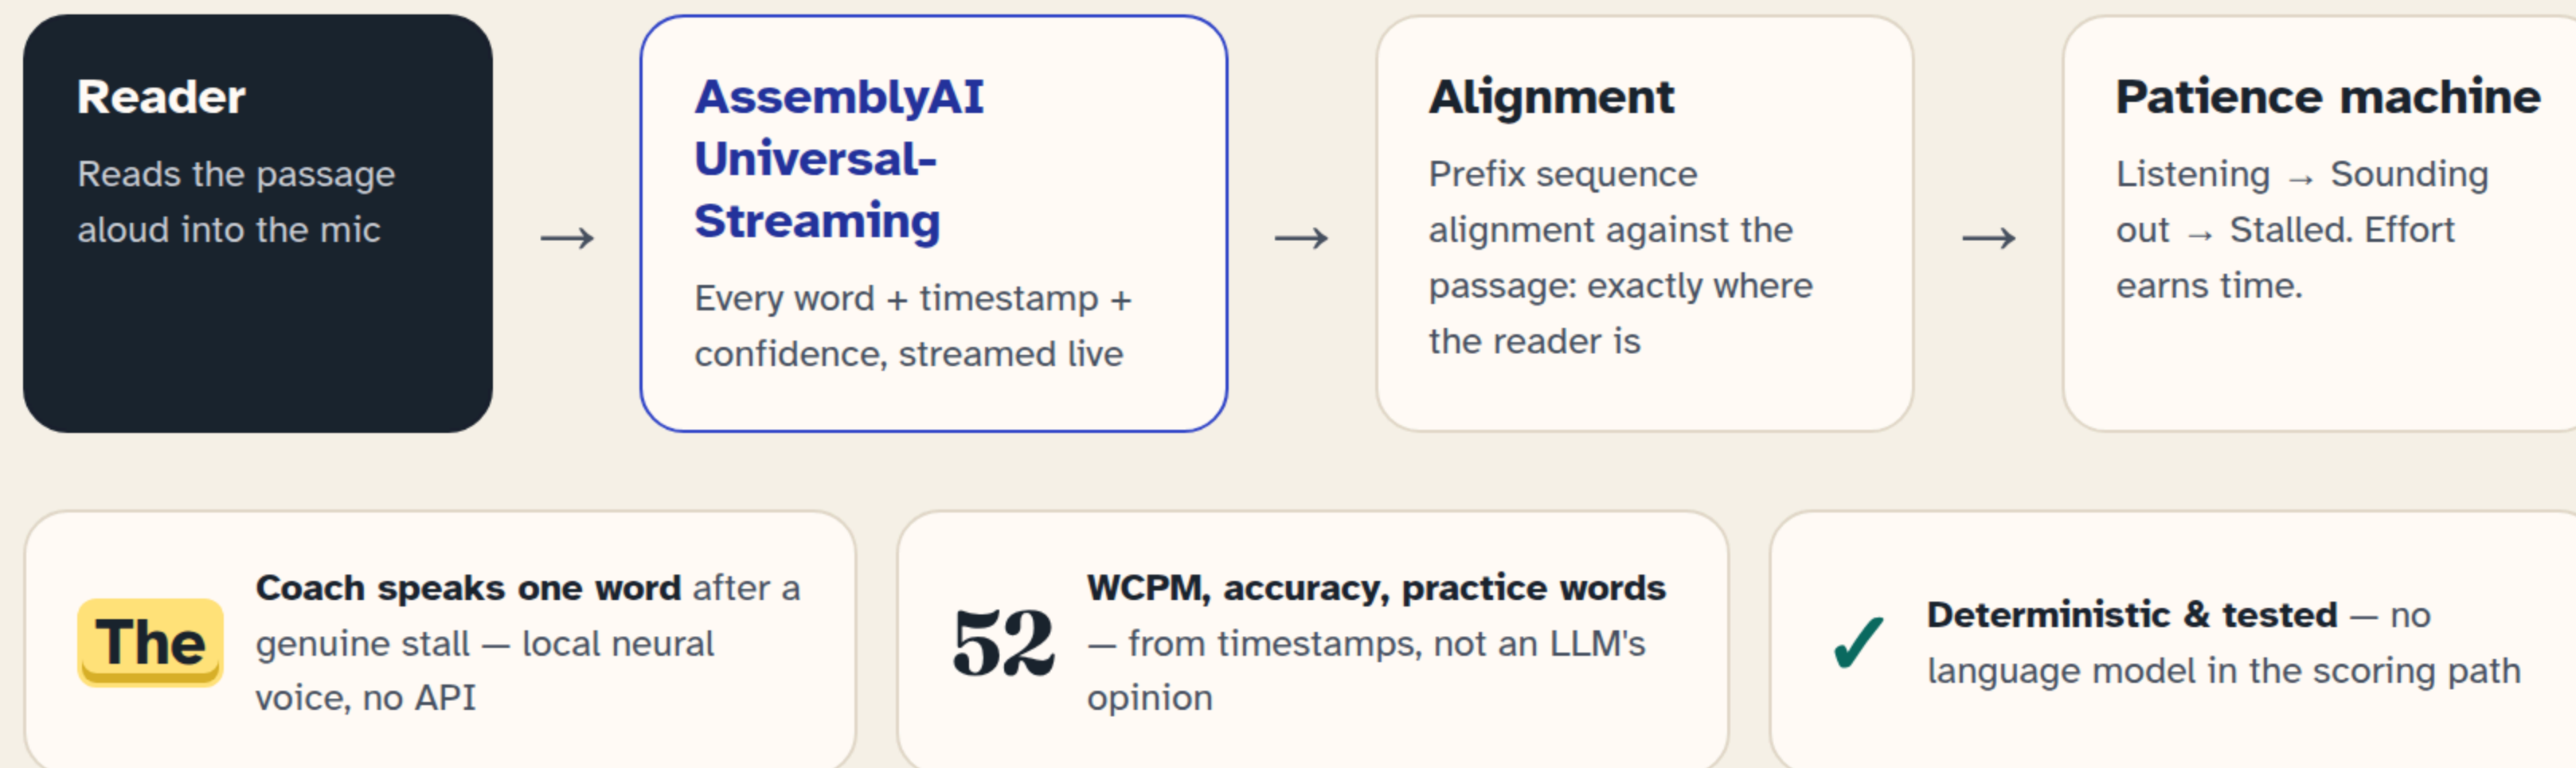

Grey, italic, dotted. Never red.

Left out of every score

Not in accuracy, not in words-per-minute, not in the practice list.

HOW IT WORKS

AssemblyAI understands speech. We decide when to help.

WHO IT'S FOR

Patient practice for every reader.

Teachers

Fluency checks in minutes, with the exact words each child found hard.

Parents

Reading practice at home that waits instead of interrupting.

Adult ESL learners

Honest feedback on pronunciation-heavy words, without judgement.

12 leveled passages, level 1 to 8 · progress kept privately on the device
